Introduction:

As our economy continues to struggle many consumers are faced with not being able to afford their medications. An individual's inability to obtain affordable medications may greatly impact symptom stability as well as his/her recovery process

In order to provide prescription assistance to those without prescription drug coverage, many Pharmaceutical Companies have developed Prescription Assistance Programs (PAP). These programs help patients who lack medication coverage and/or have limited financial means to obtain their medication at little or no cost.

The following is a comprehensive listing of the available PAP programs from drug companies throughout the United States. The companies and medications included in this list are not endorsed or supported by the Ohio Department of Mental Health; rather they have been compiled as a public service to assist those in the community to find needed and affordable medications in order to promote wellness and recovery.

The compiled information has been selected directly from the respective (pharmaceutical) company's websites and from needymeds.org. Our goal is to provide a resource that empowers consumers to manage their own recovery and wellness.

Abbott Pharmaceuticals Patient Assistance Foundation

800-222-6885

www.abbottpatientassistancefoundation.org

Eligibility:

Financial eligibility is based upon current Federal Poverty Guidelines (FPG) adjusted for household size. If a patient's medication cost is reimbursed by a private or public insurance program (including Medicaid and Medicare Part D plans), the patient will not routinely be accepted into the program. However, The Abbott Patient Assistance Foundation recognizes that extenuating circumstances may exist and encourages any patient to request special consideration if, despite existing prescription insurance coverage, he or she cannot pay for needed medication. All such requests will be considered or reconsidered on a case-by-case basis.

Bridges to Access

Eligibility:

The patient must have no prescription coverage for the requested medication and have an income at or below 250% of the Federal Poverty Level. Medical diagnosis necessary for this program is not specified. The patient must also be a US resident. Applicants can enroll by mailing a completed application, a current prescription and income documentation. An advocate, however, must call to enroll Bridges to Access applicants who need immediate access to medicine (please see web page <http://www.bridgestoaccess.com/> for further details about the two methods of enrollment). If the patient chooses not to enroll in Part D and is not eligible for the Low Income Subsidy Program, then s/he may be eligible for this program. The application can be filled out and printed on the website, but each application needs an individual number (which the website does automatically.)

Bridges to Access (1-866-PATIENT) is the program for non-oncology products.

GSK Access

Eligibility:

GSK Access is a program that provides GlaxoSmithKline prescription medications at no cost to Medicare Part D Prescription Drug Plan enrollees who meet the eligibility requirements. Eligibility is based on annual household income and proof that the applicant has spent \$600 or more for prescription medicines for the year. A completed application along with income documentation and proof of prescription expenses must be mailed to GSK Access for processing. Applicants will be notified if they qualify for the program and, if approved, a pharmacy card will be mailed to the applicant that may be used at any retail pharmacy to pick up GlaxoSmithKline medicines at no cost. Drugs received from this program do not count toward True Out-of-Pocket Spending (TrOOP).
